PROFESSIONAL SUMMARY

Result-driven and practical **Applications Developer** with a solid foundation in software engineering, modern web architectures, and full-stack system integration. Experienced in translating operational and business challenges into smart digital solutions, automated workflows, and user-centric multi-platform applications. Proficient in JavaScript, TypeScript, React Native, React, Node.js concepts, and Spring Boot backends, complemented by modern toolchains and automated workflows. Strong analytical mindset, proactive problem-solver, and eager to collaborate with cross-functional teams to drive digital efficiency and operational solutions.

TECHNICAL SKILLS

- **Programming & Core Languages:** JavaScript (ES6+), TypeScript, Java, HTML5, CSS3.
- **Backend & APIs:** Spring Boot, Spring Security, Spring Data JPA, Hibernate, RESTful APIs, Node.js concepts.
- **Frontend & Mobile:** React, React Native, Expo, Next.js, Vite, Tailwind CSS, Bootstrap, Responsive Design.
- **Databases & Tools:** PostgreSQL, MySQL, SQLite, SQL.js, Git, Docker, CI/CD pipelines, AWS S3.
- **Methodologies:** Agile, Cross-functional collaboration, Process Digitalization, Requirements-to-Solution Mapping.

PROJECT EXPERIENCE

AlmaVota – Participatory Citizenship Platform | *Full-Stack Developer*

- Developed a comprehensive multi-tier civic engagement platform featuring admin, auditor, and citizen interfaces alongside an Expo/React Native mobile app for Android.
- Built a robust Spring Boot backend integrating JWT authentication, role-based authorization, multi-image upload handling (AWS/local storage), and verifiable digital voting receipt generation.
- Structured modular frontends (Vite, React) to support proposal management, real-time debates, and data auditing workflows.

User Management System | *Full-Stack Developer*

- Engineered a modern full-stack application for user administration utilizing a client-server architecture with React, Vite, and Spring Boot.
- Implemented secure RESTful endpoints protected by Spring Security and JWT authentication, alongside AWS S3 integration for dynamic file and image management.
- Handled end-to-end CRUD operations, robust form validations, and seamless Axios-based frontend-backend communication.

Expense Tracker & Weather Mobile Applications | *Mobile Developer (React Native / Expo)*

- Designed and developed cross-platform mobile and web applications using React Native, Expo, and TypeScript.
- Integrated local and relational data persistence using SQLite and SQL.js for multi-platform execution, alongside external REST APIs (OpenWeatherMap) and device native geolocation services (`expo-location`).

- Implemented clean functional folder architectures, modular screen navigation, and intuitive UI components for optimal personal finance and meteorological data tracking.

EDUCATION & CERTIFICATIONS

- **Tecnicatura en Desarrollo de Software** | Universidad Nacional de Córdoba *(Graduated)*
- **Continuous Professional Development & Certifications** | Full Stack & Artificial Intelligence *(2026)*

LANGUAGES

- **Spanish:** Native
- **English:** Intermediate (Professional working proficiency, ongoing technical communication enhancement).
